Burst.com Awarded Fourth Network Optimization U.S. Patent

The United States Patent and Trademark Office has issued a new patent to Burst.com, Inc.. Patent #7,383,338, entitled "Method For Connection And Rapid Determination Of Optimal Multi-Media Content Delivery Over Network" was issued on June 3, 2008. The patent is the fourth U.S. patent granted to Burst that is authored by the Company's former Chief Scientist, Dr. Arthur Allen. Burst's latest network optimization patents utilize Mathematical Optimization Theory to address the problems associated with multi-media network delivery, and in particular to create efficient methodologies for delivering bit-rich content.
